Consolidated Financial Performance

- **Consolidated sales** totalled COP \$13,3 billion in 1Q17 and grew by 12.9%. The food category increased by mid-single digit in terms of sales. In 1Q17, the food mix contributed strongly to the sales growth in Brazil (+9.5%), Uruguay (+6.7%) and Argentina (+21.5%). In Colombia, however, non-food was driver benefited by the performance of the textile line. Textiles also grew in Brazil demonstrating the effectiveness of the bussiness model.
- **Consolidated Net Revenues** grew by 12.9% in 1Q17 derived from the strong sales performance in Brazil and Uruguay driven from the positive outcome of commercial activities and higher other revenues (+10.1%) driven mainly by the contribution of Complementary Business especially the real estate in Colombia and Argentina.
- Gross margin gained 30 bps to reach 23.9% and reflected the improved consumer environment in Brazil and cost efficiencies at all 4 operations despite inflation in the region and the Company's overall price-driven strategy used to maintain competitiveness.
- SG&A decreased by 30 bps in 1Q17 versus the same period last year, reflecting productivity efforts and other cost-cutting initiatives that offset inflation in the region that caused salary levels, occupancy and utility costs to rise.
- Recurring Operating Income Margin grew by 40.5% to 3.6% in 1Q17 and reflected the Company's productivity efforts despite higher inflation levels and the complex economic environment in the region.
- Recurring EBITDA margin grew by 34.9% to 5.4% in 1Q17 and the 90 bps improvement in margin reflected improvements at gross margin levels in all 4 countries, expenditure levels growing below sales and productivity gains.
- The consolidated Net Loss Result in 1Q17 was COP\$7,593 million.

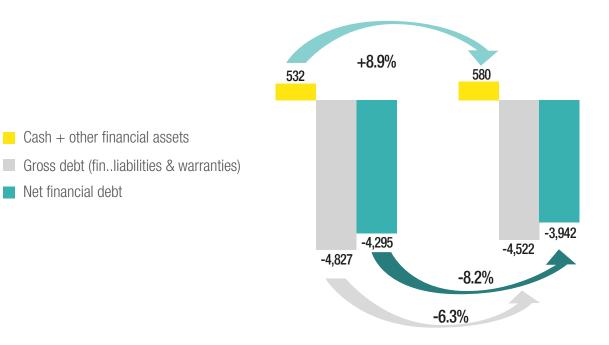

Consolidated Group Share Net results 1Q17

The Net Loss Result in 1Q17 of COP \$7,593 million derived from:

- The **positive** quarterly variations of Recurring Operating Income of Brazil of COP\$159,091 M and of the consolidated non-recurring income of COP\$23,900 M, offset mainly by,
- The negative quarterly variations of Recurring Operating Income of Colombia, Uruguay and Argentina of COP (\$20,193) M, the consolidated net financial expense of COP (\$37,270 M) and the consolidated tax provisions of COP (\$58,983) M.

Net Debt and Cash at Holding level

In 1Q17, the NFD at the Holding level closed at approximately COP\$3.94 billion, including \$450 million in USD, representing a decrease of 8.2% versus the level in 1Q16, related to the cash centralization at the holding level and optimization of receivables collection, among others.

- A long-term amortization payment of COP \$97.500 M made in Feb; one more scheduled for Aug.
- Interest rates related to the Company's debt were below IBR3M + 3.5% in COP and LIBOR3M + 1.75% in USD.
- The repo rate in 1Q17 of 7.0% was 50 bps higher than the one posted versus the same period last year (6.5%).

Cash at Holding level

• In 1Q17, the Cash and other financial assets at the holding level closed at approximately COP\$580,00 million, representing an increase of 8.9% versus the level in 1Q16. The higher cash flow level by COP\$48,000 M derived mainly from WK improvements related to inventory optimization.

Sales in Colombia

% Var Total sales and SSS including calendar effect of -1 day in February 2017 is 1.4%.
 B2B: Sales from Allies, Institutional, third party sellers and Surtimayorista.

In Colombia, economic contraction and the tax reform of 2016, negatively affected consumer confidence levels (-24.3 1Q17 vs -20.1 1Q16) and the retail confidence index (18.6 Mar/17) that reached its lowest level since August 2015.

- The subsequent 3% VAT increase led to a weak retail sales performance trend, excluding gas and vehicles, that experienced a
 contraction of -1.4% during the guarter.
- Grupo Éxito's **total sales in Colombia** reached COP \$2,6 billion amidst weak consumption and a decelerated inflationary trend (CPI 4.7% in 1Q17 vs 8.0% in 1Q16; CPI food 3.7% in 1Q17 vs 12.4% in 1Q16).
- Sales in the country suffered an annual contraction of 1.0% in 1Q17 versus the same period last year when adjusted by the calendar effect (-1.4% due to a one day less in February). Nevertheless, the organic expansion of 20 new stores opened during the last 12 months as well as the positive customer response towards the Company's commercial activities contributed to sales and partially offset by the very negative national retail sales trend.
- The mix share in the food category lost 90 basis points and was 73.4% in 1Q17 versus the same period last year, while the non-food category benefited from the increased share and growth of the textile category in all banners reflecting the strong acceptance of our Every Day Low Price strategy among customers. Textile continued as the best performer while entertainment showed resilience in 1Q17.
- Same-store sales in Colombia decreased by -2.2% in 1Q17 when adjusted by the calendar effect.
- The Éxito segment represented approximately 69% of sales in Colombia and experienced flat growth adjusted to the calendar effect, showing the resilient performance of hypermarkets derived from commercial strategies. Sales of the Éxito segment were stable and posted like-for-like levels of -1.5% in 1Q17 when adjusted to the calendar effect.
- In the Carulla segment, sales decreased by -1.6% in 1Q17 and posted a -2.2% like-for-like level both adjusted from the calendar effect.
- The **Discount** segment posted sales and same-store sales levels of -4.8% in 1Q17 when adjusted to the calendar effect. The performance of the discount segment reflected Grupo Éxito's expansion strategy of focusing on store profitability.
- Sales in the **B2B** segment included sales from "Surtimayorista" our first cash and carry store in Bogotá that is already profitable and its sales are 2.7 times/sqm after conversion vs. the previous format. The segment also included sales from the 1,336 "aliados" reached as of 1Q17.

- Quarterly **Net Revenues** decreased by 2.2% in 1Q17 due to lagging sales levels impacted by a lower inflation trend and the weak economic performance in Colombia. Other revenues represented 3.5% as a percentage of Net Revenues in 1Q17 and the 3.6% growth mainly stemmed from the performance of the real estate business, which included additional revenues from Viva La Ceja and Viva Barranquilla.
- Gross Margin in 1Q17 grew by 3.4% and gained 140 basis points versus the same period last year reaching 25.4% as percentage of Net Revenues. Gross margin levels benefitted by a lower inflation rate and reflected efforts to improve productivity mainly from lower shrinkage levels that improved as percentage of sales and from lower logistic costs. The higher contribution of complementary businesses mainly related to the real estate unit also favoured the margin increase.
- SG&A Expenses in Colombia grew by 4.9% and represented 22.1% as a percentage of Net Revenues. SG&A included higher occupancy costs related to the increase in leases, the effect of store sale and lease backs that impacted D&A during the last 3 quarters (+2.5% 1Q17, 8.3% 4Q16, 7.0% 3Q16) and higher local taxes.

SG&A Expenses in 1Q17 posted the lowest increase in the last two years. This positive outcome drove from Grupo Éxito's focus on operational efficiency and the deployment of clear action plans.

• Recurring Operating Margin was 3.3% and Recurring EBITDA margin remained flat at 5.6% in 1Q17 versus the same period last year. Margins benefitted from productivity efforts that offset expenditure levels.

Sales in Brazil

	1Q17					
	Total Sales (In COP M)% Var. of Total sales adjusted by calerndar effect% Var. of SSS adjusted by calerndar effect					
Total Brazil	9,742,308	9.5%	5.6%			

(1) Variations in sales and SSS in local currency. Adjusted for calendar effects related to: February (1 day less) and March (Easter effect). The adjustment was 280 bps for GPA Food. Brazil's food figures include: Multivarejo + Assaí. Via Varejo registered as a discontinued operation.

- Sales at GPA related to the food business grew by 19.0% and reached COP\$9.7 billion and rose by 9.5% in terms of local currency when adjusted by the calendar effect during the first quarter 2017 versus the same period last year. Sales grew by over 2x of inflation levels in Brazil, confirming the recovery at Extra hypermarkets and the consistent sales contribution and strong performance of Assaí.
- In terms of food retail expansion during 1Q17 the Company opened 1 Pao de Açúcar store while the Aliados Compre Bem model brought as a synergy from Éxito, also gained traction with 48 new partners during 1Q17 and reached 150 stores. Another 8 stores are currently under construction 7 of which are Assaí (including 5 conversions from Extra Hyper and 2 new stores) and 1 Minuto Pao de Açucar, which are scheduled to open in the second and third quarters of 2017.

Same-store-sales growth in the food segment in Brazil was 5.6% in 1Q17 in terms of local currency after adjusted by the calendar effect. The outcome derived mainly from the strong 12.9% growth in Assaí as well as from the sequential recovery of the Extra hypermarkets. Thus, sales and LFL levels of the food business excelled in the midst of a strong declining inflation trend in Brazil that went on average from 13.1% in 1Q16 to 5.2% in 1Q17.

• Assaí sales grew by 28.8% in 1Q17 in terms of local currency and when adjusted to the calendar effect and increased its sales contribution to the food segment to 38.3%, an increase of 640 basis points versus the same period last year. Sales benefited by organic expansion with the opening of 12 Assaí stores in the last 12 months. These include 2 Extra Hyper stores converted to Assaí at the end of 2016 which continued delivering strong performance in 1Q17 and posted a solid 2.5x sales growth and around 50% in customer traffic. Five more stores are already in the conversion process and are expected to open in the second and third quarter of 2017, for at least 15 conversions at the end of the year.

The banner continued to experience consistent and solid SSS growth and significantly outpaced inflation, posting 12.9% in terms of local currency when adjusted by the calendar effect in 1Q17, driven by the sustained double-digit growth in customer traffic and despite lower food inflation by 790 basis points. Store maturity and higher traffic has allowed the banner to continue gaining market share as was the case in 2016.

- Multivarejo posted 2.0% SSS growth in 1Q17 in terms of local currency and adjusted by the calendar effect. Multivarejo also posted an improved customer traffic trend of and a volume recovery versus the same period last year. The sales outcome is quite positive taking into account the negative effects from the lower food inflation within the period and the closure of 60 stores in the last 12 months, 20 of which were in 1Q17.
- In Extra hypermarkets, SSS levels increased by 5.4% in 1Q17 versus the previous quarter when adjusted by the calendar effect. This outcome was significant considering that food inflation was 520 basis points lower versus the previous quarter, reflecting the accuracy of commercial activities implemented by Grupo Éxito through its synergy plan and without putting additional pressure on gross margins. The format also posted market share gains in terms of volumes in the last 12 periods and current level is higher than the historical figure posted in 2015 as well as demonstrated accelerated growth compared to the market year-to-1Q17. In Extra supermarkets, volumes recovered with a growth in 1Q17 of around 2% and SSS were 1.0% when adjusted by the calendar effect, despite a lower food inflation level. Moreover, the format posted improved customer traffic during 1Q17 versus the previous quarter and when compared to the same quarter last year.
- Pao de Açucar improved its volume trend and customer traffic, however, the lower inflation level in the period offset SSS performance. The banner retained its market share in the first two months of the year.
- The **proximity** format posted sales impacted by the closure of 41 stores in the last 12 months as well as store conversions from Minimercado Extra to Minuto Pao de Açucar stores in 1Q16 that also affected LFL levels.

- Net Revenues grew by 19.1% in Colombian Pesos during 1Q17 versus the same period last year. These sales figures confirmed the recovery at Extra hypermarkets and the consistent sales contribution and strong performance of Assaí. Other revenues were also a strong contributor as posted a 22.9% growth.
- **Gross margin** rose by 20.2% to 22.4% in 1Q17 versus the same period last year. The 20 bps margin increase stemmed from precise and successful investments in promotions, the faster maturity of the Assaí stores opened in 2016 (despite the higher share of the sales mix of Assaí) and from lower shrinkage.
- SG&A Expenses experienced a significant reduction of 100 bps in 1Q17 versus the same period of last year, due to the discipline
 and control over operating expenses from the initiatives adopted last year. In Multivarejo, expense reductions originated from
 efficiency projects that led to lower electricity consumption. Additionally, the staff base was optimized by reducing near 7.000
 FTE's thanks to increased team productivity at stores and DC's and without affecting service levels. In Assaí, there was expense
 dilution in 1Q17 despite the strong expansion in the LTM.
- Key elements such as other operating revenues derived from asset divestments, the write-off of stores undergoing conversion and the reversal of provisions related to PIS/COFINS on ICMS benefitted the operational result of GPA. Thus, **Recurring Operating Income** grew by 95.9% and posted a 3.3% margin and **Recurring EBITDA** grew by 62.1% and posted a 5.1% margin in 1Q17 versus the same period last year.
- The performance of GPA was marked by significant operational improvements at Multivarejo and Assaí, which led to higher profitability, a strong increase of 130 bps at both the Recurring Operating and the EBITDA margins.

- The macroeconomic environment has weakened affected by its main commercial partners, Argentina and Brazil. Increases in unemployment rates in Uruguay, began to reflect lower consumption levels, amidst a more restrictive fiscal policy. Inflation during 1Q17 was relatively low at 6.7%; however, the market expects inflationary pressures in the coming quarters that may force higher wage levels.
- Sales in Uruguay grew in line with inflation by 6.7% in local currency and reached COP \$668.000 million in 1Q17 versus the same period last year. The food sales mix in Uruguay was 85% in 1Q17 and sales benefited mainly from the Company's expansion into convenience stores with the opening of 14 Devoto Express in the last 12 months, as this format now represents nearly 2% market share.
- In Uruguay, same-store-sales levels were 5.0% in 1Q17 in local currency when adjusted by the calendar effect, benefitted by the strong like-for-like performance of the textile and the home categories that posted low double-digit growth.
- Quarterly Net Revenues rose by 5.6% and included other operational revenues related to the insurance reimbursement for damages at the Pichincha distribution centre included in the base of 2016.
- **Gross Margin** in 1Q17 grew by 7.7% in Colombian Pesos and represented 34.6% of Net Revenues. This 70 basis point growth came from efficiencies in commercial activities along with improved negotiation terms with suppliers. Additionally, there was a seasonal benefit from having the Easter holiday break in 2Q17 rather than at the end of March as it occurred in 1Q16.
- SG&A Expenses increased by 19.5% in 1Q17 mainly derived from growth of 60 bps in operational expenses and a change in D&A that went from an income to an expense as in 2016 there was a retroactive effect derived from the adjustment to reduce the asset life base in 2015. Operational expenses related mainly to the effect of wage increases due to union negotiations.
- **Recurring Operating Income** margin was 9.0% in 1Q17 reflected the higher gross profit level affected by a higher expenses at the operational level and changes in the D&A base (+168%) from the adjustment to reduce the asset life base in 2015.
- Recurring EBITDA margin grew by 5.8% and remained stable at 9.9% in 1Q17 versus the same period last year, demonstrating consistent growth and healthy profitability levels.

- Argentina's macro environment continued marked by weak retail sales levels and an overall lack of consumer confidence. The country experienced a lower inflationary trend as the index decreased from 35.6% in 1Q16 to 33.9% in 1Q17. Nevertheless, CPI that was nearly 40% in 2016 already created pressures at the cost and expense level.
- Libertad Sales totalled COP\$321,000 million in 1Q17 and posted both sales and SSS growth of 21.5% in local currency when adjusted by the calendar effect. The sales performance of Libertad was affected by quarterly retail sales in Argentina that contracted by 3.7% according to CAME. Despite the macro environment, 1Q17 sales benefited from the proximity format that grew sales above inflation in local currency as well as from food sales, mainly in the fresh line.
- The food mix grew by 360 bps in 1Q17 versus the same period last year to 75% mainly driven by commercial activities. The growth of textiles in line with inflation derived from the implementation of the textile model already present at 6 stores, benefited the non-food category, however, the flattish result of entertainment and home due to the elimination of sales on credit during the 1Q17, allowed only a slightly positive result of the category. Nonetheless, this result compares to the negative single-digit outcome posted by the market during the first quarter 2017.
- In Argentina, 2 premium proximity stores opened under the Petit Libertad banner (3 in LTM), which captured the format expertise gained by Minuto Pao de Açúcar in Brazil and Carulla Express in Colombia. The Company totalled 28 stores year-to-1Q17 in the country.
- Quarterly Net Revenues totalled COP\$348,000 million in 1Q17. The sales decrease offset higher revenues from "other" which rose by 20%, mainly from the strong performance of the real estate business.
- **Gross margin** in 1Q17 was 36.4% as a percentage of Net Revenues and the 70 bps growth derived from the strong contribution of the real estate business.
- SG&A Expenses grew by 4.3% in 1Q17 in Colombian pesos to 34.3% as percentage of Net Revenues. Increased expenditures
 reflected the inflationary effect on wages and increases in general expenses mainly related to utilities and marketing activities to
 boost sales.
- **Recurring Operating margin** was 2.1% in 1Q17 as a percentage of Net Revenues and **Recurring EBITDA** margin was 3.2%. Margins reflected the weak economic performance seen in the country that mainly affected the non-food category and drove the contraction in sales and the expenditures affected by high inflation levels. Nevertheless, the real estate business continued as the main Ebitda generator, offering some resilience to the outcome.

Company's International Strategy and the Synergy Processes

Grupo Éxito continued deploying its synergy plan across the region.

Joint commodity purchasing activities continued at regional levels with top multinational food and non-food vendors. The Company moved 209 containers in 1Q17 (versus 330 in 2016) with savings in food purchasing activity at the cost level. The Company benefited from the LatAm business encounters developed in the 4 countries with vendors exporting various products where the group has a retail platform and by improving terms with suppliers.

The textile strategy that began in Colombia has already been deployed at various hypermarkets in **Brazil, Argentina and Uruguay**, through a unified product sourcing across the retail platform in the 4 countries, this contributed to improve volumes, sales and EBITDA levels in the textile category.

The "Ally" model that began Colombia has been implemented in Brazil under the name "Aliados CompreBem" and has continued growing to reach 150 partners. The strategy is completely in line with the number of allies and sales levels that we expected as per the business plan.

The Company continued its expansion plan in Uruguay. Also deploying **Argentina's commercial model** across LatAm, favouring growth in terms of tickets and volumes as well as strengthened market share across banners. Additionally, it is implementing an exchange of best practices between Colombia and Brazil that favoured shrinkage level decreases. Added back office activities also were included to adapt the business to the continuously growing integrated operation in order to operate more efficiently and to obtain cost savings.

Synergies captured in 1Q17 in value reached the level achieved in FY 2016 (USD\$25M).

Grupo Éxito confirms that the expected run rate from synergies should reach at least USD\$50 million in recurring gains in 2017.

2017 Outlook

Latam:

- Latam synergy outlook exceeding USD\$50 million.
- Gradual decrease in interest rates (Col, Bra) to lower financial expenses and drive consumption levels.
- Mid-term economic recovery expected in Colombia, Brazil and Argentina.
- Focus on cost and expense control activities.
- Expansion focus on cash and carry (Bra, Col).
- High potential from store conversions and premium store renovations.

Brazil:

- Focus on cost and expense control.
- Assaí: 6 to 8 new stores and 10 to 15 conversions from Extra.
- Pao de Acucar focus on store renovation and customer experience.
- Ongoing divestment process of Via Varejo.

Colombia:

- Gradual recovery in consumption by 2H17.
- Focus on cost and expense control activities and in profitable expansion.
- Real estate expansion of Viva Malls (+120k sqm of GLA by 2018).
- Consistency in profitable activities to face competition (cash and carry, unbeatable, private label, fresh product model and allies).
- "Puntos Colombia", to be launched by 2018.

Uruguay:

- Continue strengthening market share and expanding in high-return formats with the opening of 10 to 15 Devoto Express stores.
- Maintain solid margin levels.

Argentina:

Strengthening the real estate business by constructing GLA of nearly 35,000 square meters in the next 2/3 years.

Quarterly **Net Revenues** decreased by 2.5% in 1Q17 mainly due to a weak sales performance negatively affected by lower inflation and the challenging economic environment in Colombia. **Total sales in Colombia** reached COP \$2,6 billion and posted a decrease of 2.1%. **Other revenues** represented 2.0% as percentage of Net Revenues in 1Q17 and posted a 17.5% decrease mainly derived from lower revenues from the credit card business affected by a lesser customer appetite for credit.

Gross Margin in 1Q17 grew by 1.3% and gained 90 basis points versus the same period last year at 24.3% as percentage of Net Revenues. Gross margin levels reflected efforts to improve productivity mainly from lower shrinkage levels.

SG&A Expenses in 1Q17 grew by 4.2% and represented 21.6% as percentage of Net Revenues. The SG&A increase in 1Q17 below inflation reflected mainly higher occupancy costs related to the increase in leases partially offset by a focus on operational efficiency.

Recurring Operating Margin decreased 17.3% to a 2.7% margin and **Recurring EBITDA** decreased 11.1% to a 4.7% margin in 1Q17 versus the same period last year. The negative performance of Net Revenues and higher expenditure levels offset improvements at gross levels and affected margins.
